

COMP 171 - Lab 5 – Broken Screensaver

NAME:

- 1) Watching the screensaver work, what is your initial idea for an algorithm for making a screen saver like this using turtle?

- 2) After examining and cleaning up the code presented, what is their algorithm (and how was it different from yours)?

There were **two main problems** in the code you were given.

- 3) What was the first problem?
 - a. Was the error a **syntax**, **runtime**, or **semantic** error?
(see chapter 1 "debugging" section if you don't remember these terms)

 - b. How did you fix the problem?

- 4) What was the second problem?
 - a. Was the error a **syntax**, **runtime**, or **semantic** error?

 - b. How did you fix the problem?
